

Acceptance Testing

UAT Execution & Report Submission

Date	30 September 2026
Team ID	SWTID-2026-1617
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

1. UAT Execution

Execute the UAT checks for the Import Data using Transform Maps project. Verify that Employee Training Records is configured with Training Name, Completion Date, Status and Employee; spreadsheet data is loaded through System Import Sets; Transform Maps and Field Maps correctly transfer the data; and the Employee reference supports dot-walking to Department information.

2. Security Validation

Verify that the user and HR Manager role are configured correctly. Test the Read and Write ACLs for Employee Training Records. Use impersonation to confirm that an authorized user can access the required records and that a user without the required access cannot access the protected table.

3. UAT Execution Checklist

Test ID	Test Area	Status	Expected Verification
UAT-01	Employee Training Records table and fields	Not Executed	Verify table and required fields.
UAT-02	Spreadsheet / Import Set	Not Executed	Verify spreadsheet upload and import-set data.
UAT-03	Transform Map / Field Maps	Not Executed	Verify source-to-target field mapping and Transform.
UAT-04	Dot-walking	Not Executed	Verify Employee → Department related information.
UAT-05	User and HR Manager role	Not Executed	Verify user creation and role assignment.
UAT-06	Read ACL	Not Executed	Verify authorized read access.
UAT-07	Write ACL	Not Executed	Verify authorized edit access.
UAT-08	Unauthorized access	Not Executed	Verify restricted users cannot access records.
UAT-09	Final validation	Not Executed	Verify the complete importing and security workflow.

4. UAT Result & Report Submission

Record the actual execution result for each test case after testing. The submitted report should contain the test status, evidence or observations, defects if any, and final acceptance status. The source material does not provide actual executed UAT results, so results must be entered after execution rather than assumed.

5. Submission Checklist

S.No.	Submission Item
1	Employee Training Records table verified
2	Spreadsheet data successfully loaded
3	Transform Map and Field Maps verified
4	Imported records verified
5	Dot-walking to Department verified
6	User and HR Manager role verified
7	Read and Write ACLs verified
8	Authorized and unauthorized access tested
9	UAT results and observations recorded
10	Final UAT report submitted

6. Final Acceptance

The UAT submission is complete when the importing workflow and security controls have been executed and the actual results have been recorded. Acceptance should confirm correct spreadsheet import, Transform Map processing, related employee information, role-based access, ACL behavior and final access validation.
